RSRF

In-Building Cellular Coverage Solutions For Enterprise Buildings

DAS solutions tailored to your building's unique design

Whether you have a new building or a reconstructed property, if you need cell phone coverage inside the space we can provide the solution.

Working with RSRF is simple

Initial Review

- Floor plan size and space analysis
- Building materials and project specifications
- RF coverage solutions

3 to 5 days

Site Survey

- iBwave DAS plans
- Cable routes, building structure, and signal audit
- Data used for DAS deployment

1 to 2 days

Proposal Review

- Recommendation of DAS Platform
- Equipment and component costs
- Installation and support plans

5 days following survey

Deployment

- Provision GPS antennas
- Testing and customer hand off
- On-going remote monitoring and support

3 to 6 weeks after approval

We start with a review of the floorplan and signal coverage specs for the building. Next we conduct a site survey and gather additional details about the site. Our site audits are thorough and include authentication of the cabling and equipment plans. We add that data into the industry standard iBwave software tool to complete a DAS plan for your building. Using the data about signal strength, user capacity, and building characteristics our team recommends the best DAS solution for your facility.

.

We share that data and analysis with you and explain the rationale behind our recommendations. You'll gain insights about signal values, building construction, and user load , so you can confidently make a decision that achieves your business and budgetary objectives. After the in-building DAS technology is installed we monitor the operation, so you don't have to worry about maintenance or service.

Offices located in

- Orange County, CA
- San Francisco
- Atlanta
- Philadelphia

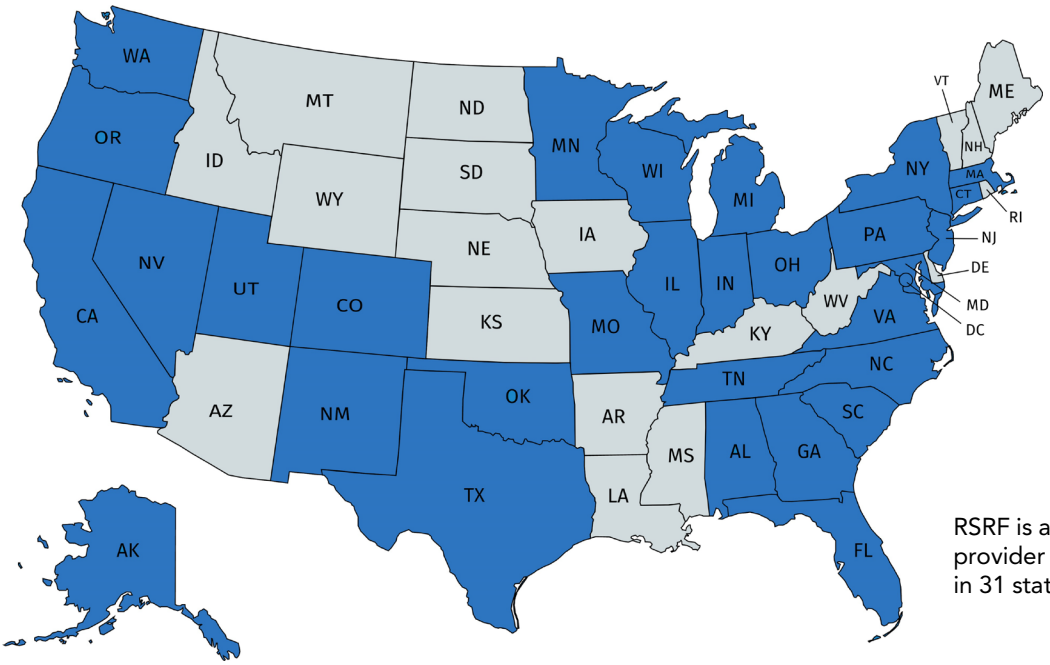
Cellular Connectivity is Essential

Active DAS (distributed antenna system) is the premier platform for delivering quality service inside large buildings. RSRF works with leading DAS OEMs to develop in-building cellular connectivity solutions tailored to your needs.



RSRF is a nationwide DAS solutions provider and has worked on projects in 31 states since 2013.

Current installations include:

- USAF, Military Medical Center, CA / 800,000 SF
- Roku, 5-building Corporate Campus, CA / 750,750 SF
- 414 Light St., 44-story, Mixed-Use Building, MD / 592,000 SF
- 65 Bay St., 52-story, Luxury Apartment, NJ / 507,000 SF
- Courtyard/Residence Inn, 12-Story Hotel, DC / 467,617 SF
- Lydian, 14-Story, Luxury Apartment, DC / 378,000 SF
- USAF, Military Medical Center, NV / 335,000 SF
- Lyric, 14-Story, Luxury Apartment, DC / 263,000 SF
- 800 Corp. Pointe, 4-story, Corporate Office, CA / 240,000 SF
- Serta Simmons, Corporate Office Complex, GA / 220,000 SF

About RSRF

RSRF is a turn-key systems integrator of in-building signal coverage solutions for buildings ranging in size from 50,000 to over 500,000 square feet. Enterprises work with us when they want uninterrupted cell phone service and data connectivity throughout buildings and campuses.

A sister company of Staircase 3, Inc., RSRF focuses on providing evidence-based DAS solutions to improve cellular performance in all types of buildings. Our active, hybrid DAS and passive technologies are all carrier-approved and FCC certified so they are ready for immediate deployment in residential and commercial buildings. We also provide complete public safety DAS solutions.

Delivering the most cost-effective connectivity solutions to enhance single and multi-carrier signals is our goal. By being DAS agnostic, we have the flexibility to tailor solutions to effectively meet the unique challenges presented by virtually all building types including:

- Hospitals and medical care facilities
- Military installations
- Commercial office and multi-unit residential buildings
- Hotels, resorts and spas
- Industrial, manufacturing, and warehouse facilities
- Educational institutions

RSRF – Deep Expertise in RF and Electrical Engineering

Investing in the right cellular DAS solution ensures an easy migration to 5G service. Options for improving 5G connectivity include Active DAS, Passive DAS, and Hybrid systems. RSRF's nationwide installation team typically deploys DAS solutions across the country, in weeks rather than months..

Meet the Team Behind RSRF

Sina Khanifar

Tom Hernandez

Spencer Boegeman

Adam Xi

Sina Khanifar,
CEO

Sina has a BA, Physics from the University of Oxford. He is a Technology Fellow at the Electronic Frontier Foundation, co-founder and advisor to OpenSignal.com, Board Member of Repair.org, and an early stage business investor.

Tom Hernandez,
VP Sales and Operations

Tom has a BA, Design from Southern Illinois University. A results-focused executive with more than 8 years experience in sales and marketing of distributed antenna systems. Tom is responsible for managing the RSRF division. In this role he blends a DAS agnostic approach with an evidence-based data collection process to ensure robust cellular signal solutions for enterprise clients.

Spencer Boegeman,
Solutions Architect and Sales Engineer

Spencer has a BA in Philosophy from UCLA with emphasis in Logic. He is responsible for building relationships with the carriers, including AT&T, Verizon, and T-Mobile; OEMs with a goal of improving collaboration so that RSRF solutions deliver the results our clients require for in-building cellular.

Adam Xi, RF Systems Engineer

Adam has a BA in Economics from San Jose State University. He has 5 years of experience in RF Link Budgeting, RF DAS Design, and DAS Deployments in projects ranging from 1,000 square feet to 1,000,000 square feet. He is certified in iBwave Design Level 1 and Level 2, Corning ONE Design and Commissioning, and has experience with other DAS vendors such as: CommScope, ADRF, Comba, Nextivity/Cel-Fi, SureCall, WilsonPro, and more.

.

Learn More

RSRF's refined, proven, and repeatable process produces the most comprehensive survey possible of your facility, providing a clear roadmap to total coverage. To learn more about RSRF and our in-building DAS solutions, visit: BOMA 2020 - RSRF Overview
